

## Jeff Tutton, President

Jeff Tutton leads Intersec Worldwide's team of innovative security visionaries. Under his direction and through his hands-on work, he has helped clients save hundreds of millions of dollars while ensuring the highest level of competence and service within the company.

Mr. Tutton has conducted over 200 onsite incident response, remediation projects, and security assessments for some of the largest merchants, processors, credit card brands, and banks in the world. His expertise is highly recognized throughout the industry, supported not only by his ability to achieve results but also through the loyalty he experiences from his clients. As President of Intersec, Mr. Tutton directs and manages client projects – leveraging his experience and skill to craft solutions to the most challenging digital security situations. He can also be found developing new solutions to improve client processes and increase their bottom line.

As one of the first in the industry to be certified as a Qualified Security Assessor (QSA) in the PCI Industry, Mr. Tutton became known as the first QSA to lead and successfully complete a major data breach remediation project for a Fortune 5 Company. Among his many certifications and achievements, he earned a Master of Science Degree in Information Security and Secure Electronic Commerce from the University of London, Royal Holloway – the world's leading university in Cybersecurity. He is also widely recognized as a leading Subject Matter Expert (SME).
